

HASSOUN ILYAS

ENGINEERING STUDENT

first-year Electronics, Electrical Energy & Automation Student
at ENSEEIHT, Toulouse

EDUCATION

2026 - Present: Engineering Degree, Electronics, Electrical Energy & Automation
ENSEEIHT, Toulouse INP - Toulouse, France
2024 - 2026: CPGE MP Track
(Advanced Mathematics & Physics)
Lycée Mohamed V - Casablanca, Morocco
2024: Moroccan Baccalaureate, Mathematical Sciences B
Lycée Technique Errazi - El Jadida, Morocco (Highest Honours)

PROJECTS &ENGAGEMENT

2025 - 2026
LYCÉE MOHAMED V

TIPE RESEARCH PROJECT - HYSTERESIS MOTOR: OPTIMIZATION OF MAGNETIZATION CYCLES

- Simulation of a hysteresis motor to find the optimal compromise between hysteresis losses and useful mechanical power. The study focuses on determining the optimal rotor dimensions, selecting the best magnetic material, and identifying the ideal supply frequency to maximize overall efficiency.
- Ran numerical simulations in Python to analyse and validate the model; oral defence before a jury

SKILLS

HARD SKILLS

- Python
- C
- Arduino

SOFT SKILL

- Adaptability
- Autonomy & Teamwork
- Perseverance

LANGUES

- Arabic (Native)
- French (Fluent)
- English (Professional)

PROFIL

After completing two years of intensive MP preparatory classes at Lycée Mohammed V in Casablanca, Morocco, I moved to Toulouse to pursue my ambition of becoming an internationally minded engineer.
